

PC Assemble Lab

On 03/12/2023, we conducted a PC Assemble Lab at Makmal Inovasi, N28. We did the activity in a group of 5 members. Here's some photo of my group during the activity:

After being showed the procedure of how to disassemble and assemble the PC, we had a competition among my class and my group won the first place for being the fastest to assembling the PC. It was a very fun and unforgettable learning process.
