

Reflection on Assignment 3 – Visit To UTMDIGITAL and Virtual Talk

On 05/12/2023, we had an online industrial talk given by UTMDIGITAL. The talk is about how all UTM website are built and the special features about UTM systems. The talk provided valuable insights into the architecture and development processes behind UTM's web presence, shedding light on the unique aspects that set their systems apart. Understanding the specifics of how these websites are constructed and the special features incorporated into UTM's digital systems proved to be an enlightening experience for all participants.

On 19/12/2023, we had a visit to UTMDIGITAL in UTM. During the visit, we were granted exclusive access to various departments within UTMDIGITAL, providing us with a closer look at their operations. However, the highlight of the visit was undoubtedly the chance to explore the server room of UTM. This allowed us to witness firsthand the intricate network of servers and technologies that power the institution's digital systems. The experience not only enhanced our understanding of the technological backbone supporting UTM but also offered valuable insights into the robust measures in place to ensure the smooth functioning of their digital operations.

In conclusion, the combination of the online industrial talk by UTMDIGITAL and the subsequent visit to their facilities provided us with a comprehensive understanding. The industrial talk offered insights into the development and distinctive features of UTM websites and systems, while the visit allowed us to witness the inner workings of UTMDIGITAL. These experiences not only deepened our knowledge of technological processes within an educational institution but also underscored the significance of robust digital infrastructure in supporting academic operations.
